

# ENGINEERING DOCUMENT MANAGEMENT SOLUTION FOR METALS & MINING

## Ensure Accurate, Up-to-Date Information Every Time

With 24/7 access to accurate engineering drawings and documentation, you can reduce the average search time for relevant documentation from hours to minutes and stay compliant across regulatory bodies. Accruent's engineering document management solution establishes a centralized, secure, scalable, highly accessible repository for all engineering documentation. Our solution allows teams to track all their assets and ensure the revision history associated with these assets is accurate and complete.

**Robust document  
search capabilities help  
manage engineering drawings  
for your team**

**Ensuring every change is  
versioned and audited to  
demonstrate regulatory  
compliance**

**Single source of truth for all  
engineering documents and  
drawings, managing them  
throughout the entire lifecycle**

## **DRAWINGS VERSION CONTROL**

Alleviate the fear of users working on outdated, incorrect engineering drawings. Metals & mining can compare and track the revision history of a document or drawing easily.

## **ROBUST DOCUMENT SEARCH CAPABILITIES**

Manage the increasing number of digital documents with ease by finding relevant documents quickly.

## **REGULATORY COMPLIANCE**

Enable compliance with other global and local metals & mining-specific regulations to help minimize risk and avoid costly fines.

## **MANAGE ALL MISSION-CRITICAL DOCUMENT TYPES**

Accruent offers a full CAD-platform independent solution for engineering drawing management where metals & mining can store, manage, render, and visualize both 2D and 3D content easily from major CAD systems. Organizations keep their master data up to date while coordinating their change processes in isolated work areas with workflows, ensuring data validation, and providing a full audit trail for regulatory compliance. Users can also manage Microsoft Office documents, PDFs, scanned images and hybrid files, allowing our solution to be the ultimate repository for consolidating all legacy and project-related engineering information.

## CONCURRENT ENGINEERING

Track all documents to ensure projects run in parallel without error, which provides metals & mining real-time visibility to monitor revision from different projects and ongoing maintenance. Project members associated with the same documents and drawings are notified automatically when a parallel project releases updated documents, avoiding unnecessary delays and shortening project turnaround times.

### CONTROL DOCUMENT & DRAWING MANAGEMENT:

Provide version control, revision management and document workflows in a safe and secure environment so users can be confident that they are working on the most up-to-date documentation.

### ASSET TAG/DOCUMENT RELATIONSHIPS:

Provide robust search capabilities and ties documents to asset tags so users can locate documents hassle-free.

### ENGINEERING TRANSMITTALS:

Seamlessly create, handle, and send transmittals and easily route submitted documents through the appropriate review and approval process for maximum security and visibility.

### STANDARD INTEGRATIONS:

Enhance efficiency by providing integrations to EAM, ERP, ECM, Microsoft Office and CAD authoring applications, making it the ultimate repository for consolidating documentation.

### ENGINEERING WORKFLOWS:

Preserves established control of engineering data changes, safeguarding accurate review and approval steps for effective change control and ensuring safety and compliance.

### CERTIFIED SECURE CLOUD SERVICES:

With the help of Microsoft Azure®, Accruent provides the most comprehensive set of certifications of any cloud service provider.
