Facility and Project Management for Convenience Stores

accruent

SAVE MONEY BY USING EFFICIENT OPERATING PROCEDURES

With increasing government regulations, competition, and changing consumer buying patterns, convenience stores must be strategic about the way they invest in their business. Many convenience store businesses have to do more with fewer resources. Maintenance departments are looking at ways to streamline their processes and efficiently and effectively use their resources.

Accruent has extensive experience implementing maintenance management, asset management, remote monitoring, and project management solutions, as well as connecting those applications to diverse information systems.

Improve customer experience with faster maintenance

Gain revenue weeks from effectively managing your capital projects and programs

Gain critical visibility for both in store and fuel compliance

Retailers must find ways to increase foot traffic to physical stores and keep customers coming back. The Accruent Retail Platform is the first solution to integrate facilities and real estate management technologies, enabling retailers to differentiate from their competition and offer meaningful experiences for their customers.

MANAGE WORK ORDERS AND CONTRACTORS

- Actively manage compliance work, planned preventative maintenance, warranties, and ad-hoc work orders.
- Monitor equipment at the asset level to track repair/replace thresholds, maintenance history and compliance records
- Track important provider metrics, to better decide which companies best serve your business.

MANAGE IN STORE AND SITE COMPLIANCE

- Dynamically schedule compliance based maintenance and anniversary dates.
- Track all documentation in one location for all categories of equipment both in store and fuel pumps.
- Handle your refrigerant management needs directly in your CMMS for one view of your enterprise.

MANAGE YOUR CAPITAL PROJECTS EFFECTIVELY

- Gain revenue weeks with added visibility into project schedules, reducing cycle times and adjusting schedules in real time.
- Consolidate project data with all project contributors adding/accessing information in one standardized solution, enabling better collaboration, accountability and analytics.
- Optimize bidding by reviewing and comparing general contractor bids in comparable terms to make the best decisions and save time.

GAIN VISIBILITY INTO YOUR MAINTENANCE AND PROJECT SPEND

- See all maintenance information in one dashboard with actionable insights on what you need to do today.
- Actively adjust project templates and gain visibility into projects from a single source of truth.
- Avoid project and maintenance slowdowns from having automatic alerts generated from the application.
