HEALTHCARE CMMS
& ASSET MANAGEMENT

Keeping a healthcare system performing optimally means minimizing asset downtime, increasing patient safety, and streamlining service and maintenance. It also involves ensuring compliance with evolving policies, laws, and regulations, while safeguarding against cybersecurity threats.

Accruent's TMS is a comprehensive Healthcare CMMS (Computerized Maintenance Management System) solution that integrates cutting-edge innovations to empower healthcare professionals to address HFM & HTM challenges more effectively.

Easily manage and control asset lifecycle from acceptance compliance to support and disposition.

Modernize the way technicians work using mobile capabilities.

Ensure compliance with changing policies, laws and regulations (including CMS, TJC, DNV GL, and OSHA).

Leverage data to drive value and continuous improvement across the organization.

ACCRUENT

TAILORED TO YOUR ORGANIZATION'S NEEDS FOR MAXIMUM FLEXIBILITY

No healthcare organization has the same needs. Using TMS, your organization can improve regulatory compliance while analyzing biomedical and facility management operations. TMS allows technicians to track asset data to proactively manage vital information and constantly monitors pre-defined KPIs to maximize productivity. With accurate data, you can react more quickly, improve decision making and increase customer satisfaction.

CONFIGURABILITY

- User role-based configurability of dashboards, forms and reports.
- Departmental role-based configurability of dashboards, forms and reports.
- Access external data from within the application with quick URL links.
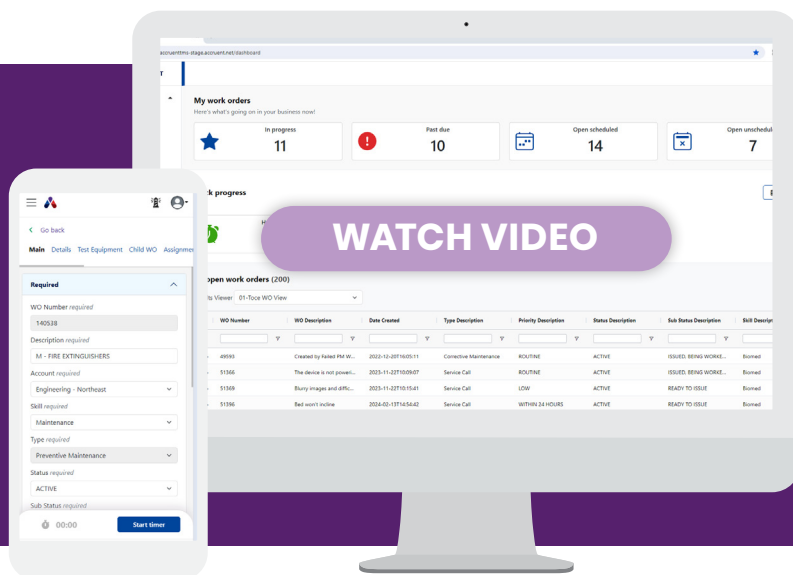

DATA ACCESSIBILITY

- Easily access data via configurable searches, including asset, work, analytics and historical data.
- Aggregate and analyze data in real time using drag-and-drop report design, dashboards and email.

PERFORMANCE MONITORING

- Monitor your team's performance, asset metrics, PM compliance and other key performance indicators.
- Display and easily edit records for each shop, department or other critical area to target oversight and compliance actions.
- Forecast manpower, parts\materials and other planning indicators to ensure proper staffing and availability of needed supplies.

FLEXIBLE MODULES

- Utilize the modules your organization needs and allow access based on user roles.
- Seamlessly cross data between modules to related records.

THE NEW ACCRUENT TMS

The power & flexibility are still there. We just put them behind a modern, easy-to-use interface with advanced tools to streamline workflows and boost efficiency.

GO BEYOND CMMS AND ASSET MANAGEMENT

Ensure compliance, mitigate risk & maximize resource utilization to control costs.

OPTIMIZE OPERATIONS

- Manage and optimize asset lifecycles.
- Improve equipment uptime.
- Increase technician productivity.
- Improve operational and financial performance through staffing, parts and contract management.

MITIGATE RISK

- Ensure compliance and mitigate risk.
- Ensure data standardization and consistency.
- Document AEM program status.

ELEVATE PERFORMANCE

- Improve visibility and availability.
- Provide a foundation for accurate equipment capital plans.
- Make informed decisions based on accurate, up-to-the-minute data via dashboards.

CAPTURE CONFIG DATA

- Develop and implement asset-specific attribute values.
- Pre-load required PM parts\materials.
- Identify CMDB and network information to reduce downtime due to IT activity.
