

# COMPREHENSIVE SPACE PLANNING SOFTWARE

## Unlock the Full Potential of Your Campus

Do you constantly feel like there's not enough on-campus space to make everyone happy? Are you looking for a better way to optimize department space allocations, justify budgets, and enhance student and faculty experience? Meet Accruent Space Intelligence (ASI).

Using ASI, you can seamlessly integrate data from course schedules, space and event bookings, maintenance, and badging systems for a holistic view of your campuses. Then, easily analyze, plan, and execute strategies that optimize space utilization, reduce total cost of ownership, and create delightful on-campus experiences.

Our user-friendly dashboards and powerful analytics also make it simple to track key performance indicators and make decisions that unlock funding and drive down space costs.

Say goodbye to guesswork and hello to smarter space management with Accruent Space Intelligence.

### Streamlined Space Utilization

Reduce time spent gathering, compiling, and analyzing data and start acting on insights that help you optimize allocation and utilization of campus spaces.

### Easier Facilities Assessment and Planning

Unlock space-related funding and execute capital investment plans that are inclusive, credible, flexible, affordable, and sustainable.

### Centralized Facilities Benchmark and Analysis

Gain full visibility into your space allocation and usage patterns and make the case for changes – to classrooms, labs, faculty offices, and more – without the guesswork.

### Improve Campus Spaces for Higher Enrollment

Evaluate on-campus needs, make virtual changes, and review their impact before you implement so you can create experiences that maximize enrollment.

## OUT-OF-THE-BOX INTEGRATIONS

## DIVING INTO THE SOFTWARE

This space management software has unique modules that enable users to analyze their current campus portfolio, plan for the future, and execute changes that make a positive impact – all from one comprehensive, easy-to-use dashboard environment. This helps higher education institutions overcome their most pressing pain points and enjoy:

- Seamless, automated data aggregation
- Centralized insights to make data-driven decisions
- Streamlined space scenario planning
- Improved faculty, visitor, and student experience
- Greater strategic and technological agility

## ANALYZE

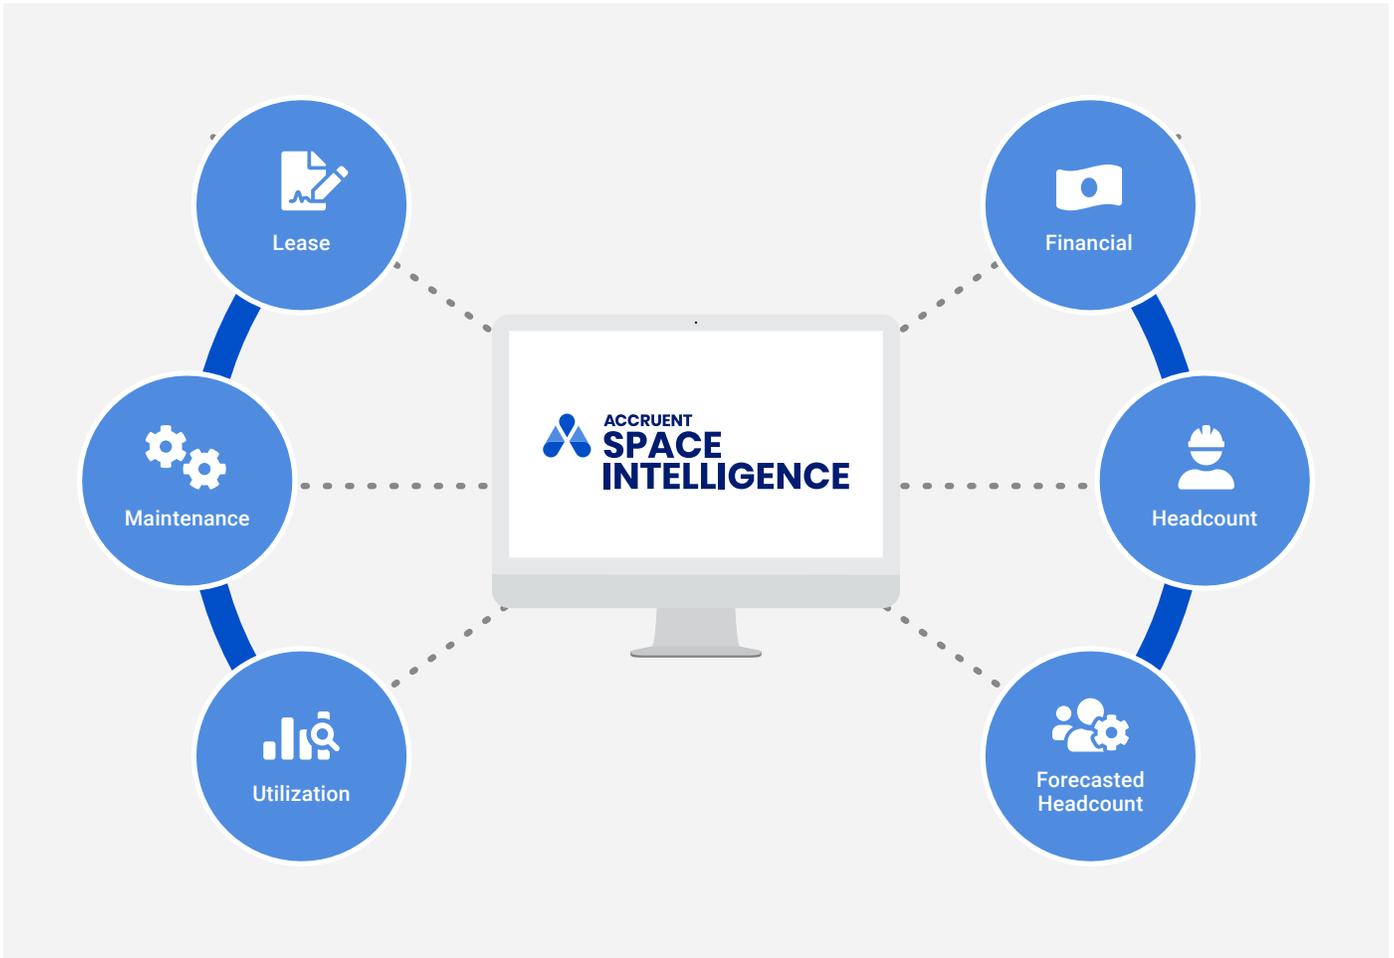

By consolidating disparate room and resource booking, lease, and maintenance data into one comprehensive platform, Analyze equips your team with the trustworthy information they need to align objectives, reduce risk, and drive operational efficiency. Using Analyze, you can:

- Drill down at building-level data, including space utilization throughout the day and operating costs
- Understand metrics across your portfolio, including average utilization, lease expiration dates, and more
- Explore space allocation insights to ensure you operate within capacity

## PLAN

An unlimited number of users can use the Plan module’s digital environment to evaluate future needs, make virtual changes, and review their impact before you implement new strategies in the real-world. That way, you can test ideas online and avoid mistakes in the real world.

- Use dynamic dashboards and interactive floor plans to compare scenarios and make drag-and-drop changes
- Compare your “test” scenarios against your current state to evaluate their efficacy
- Create effective space plans that meet your teams’ needs and help them collaborate effectively
