

STREAMLINE WORK ORDER MANAGEMENT IN AN EASY AND INTUITIVE WAY

Not all work orders are created equal—especially in healthcare facilities and asset management. Yet, efficient work order management is required to achieve operational excellence.

Every day, healthcare institutions grapple with multifaceted challenges in maintenance activities. These obstacles range from the inability to identify and plan high priority work to ineffective data input, lack of detailed information, delayed responses to equipment issues, stringent regulatory requirements, and an ever-evolving technological landscape.

With the innovative Accruent TMS cloud platform, healthcare facilities and biomedical teams can address critical pain points, facilitate smoother workflows, increase efficiency, and ensure patient safety.

Prioritize Work Orders

Let the cream rise to the top with a sleek and advanced dashboard that highlights the most critical work.

Easy Navigation

Multi-device compatibility streamlines your workload, increases communication, and improves performance.

Ensure Agility

An automated and intuitive work order workflow ensures the health of equipment, simplifies data security, and helps on cost savings.

Leverage Essential TMS Advantages

Preserve all the essential advantages such as strong compliance capabilities, simplified cybersecurity, and high configurability.

REVOLUTIONIZE YOUR FACILITY AND BIOMEDICAL ASSET MANAGEMENT WITH A NEW TMS EXPERIENCE

Browser-agnostic

Navigate in a browser-agnostic environment, ensuring compatibility across various operating systems. Increase scalability, reduce technical constraints, and create greater efficiency.

Technician Dashboard

The modern and intuitive analytical dashboard enables the effective visualization and prioritization of critical work orders, improving the overall operational performance.

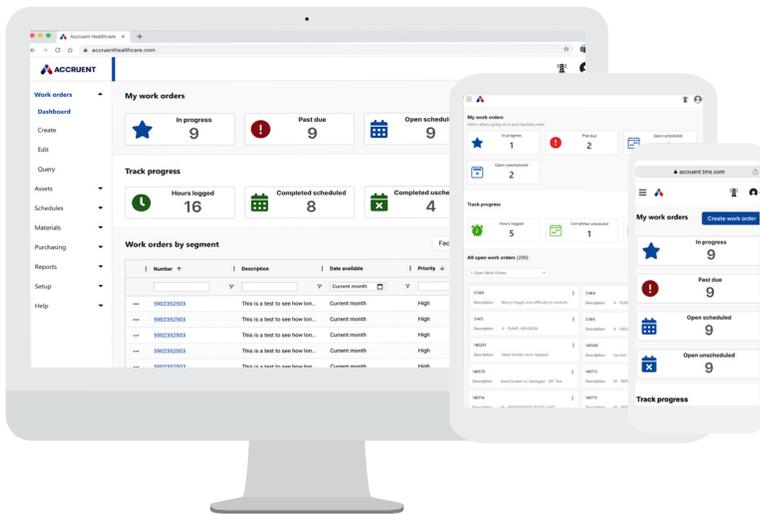

End-to-End Work Order Management

Streamline workflows with a mobile ready system and smart UX, improving the effectiveness of the entire work order lifecycle, from initiation to completion.

Streamlined Real-time Data Capture

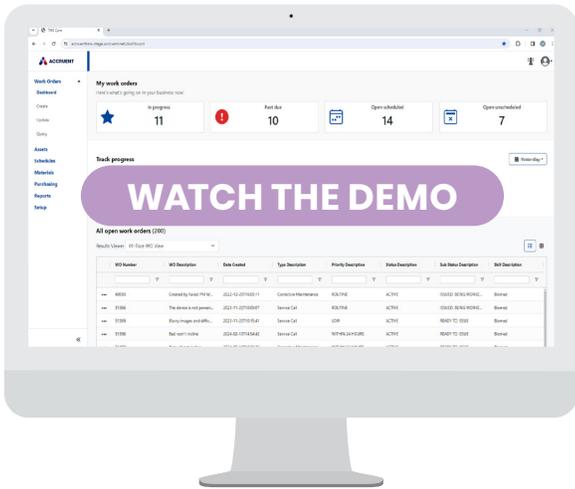

Mobile capabilities enable enhanced data integrity with direct data entry. This ensures data accuracy, avoiding the lack of detailed information within the documentation task.

ENSURE PATIENT SAFETY AND THE HIGHEST QUALITY OF CARE

The new TMS platform is transforming healthcare operations. This intuitive, browser-agnostic system maximizes the essentials that have set TMS apart in healthcare. Our software cuts through the clutter of outdated systems, offering a sleek, mobile-friendly interface that empowers technicians to quickly manage critical work orders.

It's not just an upgrade— it's a leap forward in ensuring operational excellence in real-time, higher financial performance, and ongoing patient safety. Furthermore, exciting upgrades are already on the roadmap for the near future, which will directly impact the data-driven decision-making in your company's undertakings.

ON SITE TO CLOUD: MULTIPLE BENEFITS

For on-site users, this revolutionary new Accruent TMS cloud platform offers additional advantages, including zero IT complexity and improved features such as Request Portal and Single Sign-On, enabling your team to gain efficiency and your organization to save costs.
